(54) IMAGE BLUR PREVENTING DEVICE

(57)Abstract:

PURPOSE: To provide an image blur preventing device excellent in a feeling of operation without a malfunction.

CONSTITUTION: This image blur preventing device is provided with a lens barrel 2 mounted on a camera body 1, acceleration sensors 3 and 4 attached to the camera body 1 as well, a differential amplifier 5 for obtaining the output difference between the acceleration sensors 3 and 4, a by-pass filter 6, an integrator 7, a voice coil 8 for displacing a correcting lens 10 in the lens barrel 2 in a direction opposite to that of camera shaking in accordance with the output of the integrator 7 and a sampling/holding circuit and another differential amplifier for connecting a signal corresponding to a shaking state to the voice coil 8, in a state where the signal is outputted from the differential amplifier.

LEGAL STATUS

- [Date of request for examination] 02.11.1995
[Date of sending the examiner's decision of rejection]
[Kind of final disposal of application other than the
examiner's decision of rejection or application converted
registration]
[Date of final disposal for application]
[Patent number] 2859180
[Date of registration] 04.12.1998
[Number of appeal against examiner's decision of
rejection]
[Date of requesting appeal against examiner's decision of
rejection]
[Date of extinction of right]
